Mellon
University**

We think happiness needs something special.

Travel · Success · Wealth

But everyday life is already full of small joys.

We just walk past them.

Small joys matter more than we think !

A small joy softens a stressful day.

On a stressful day that also held a small joy:

↓ Severity

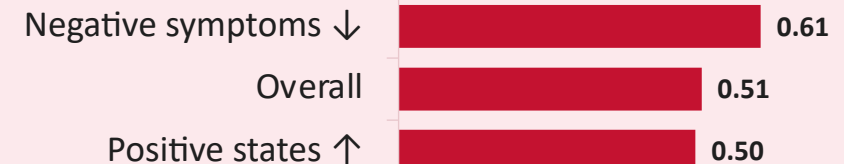

↓ Threat

↑ Control

vs. stressful days without one · $p < .05$

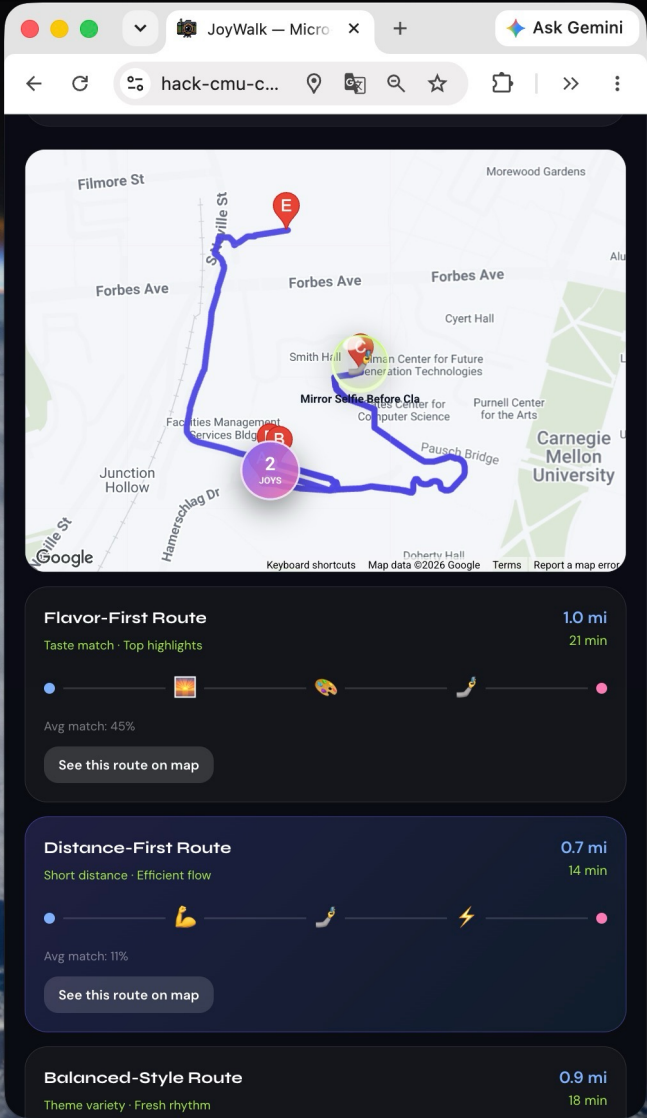

N. L. Sin & D. M. Almeida, 2018

Savoring good moments improves well-being.

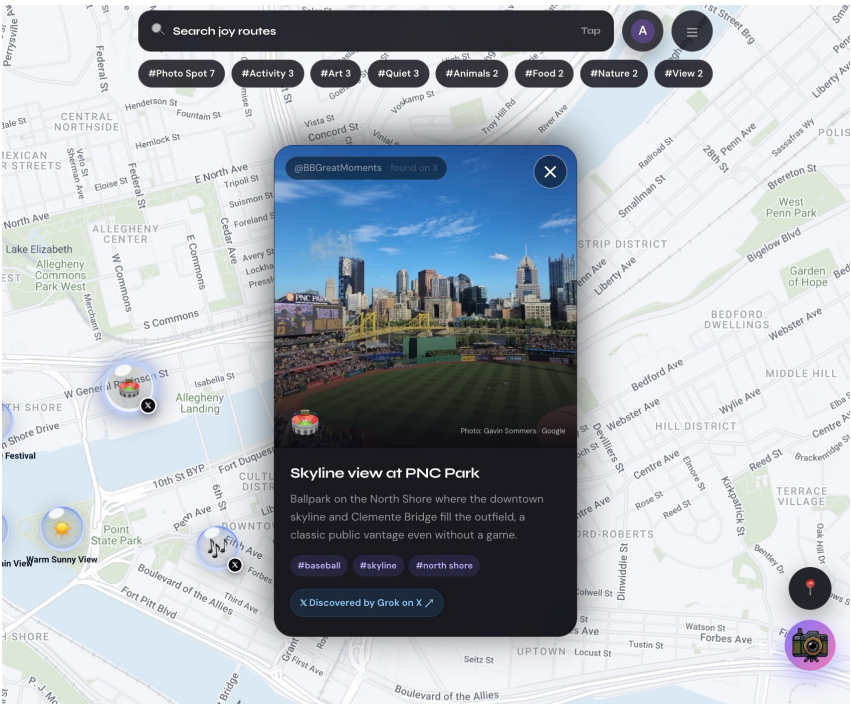

Effect size (Hedges' g) · 0.5 ≈ medium effect

Chen et al., 2026 · meta-analysis of RCTs

*“JoyWalk doesn't create happiness.
It helps you discover the joy already on your way.”*

JoyWalk

BY TEAM ODYSSEY

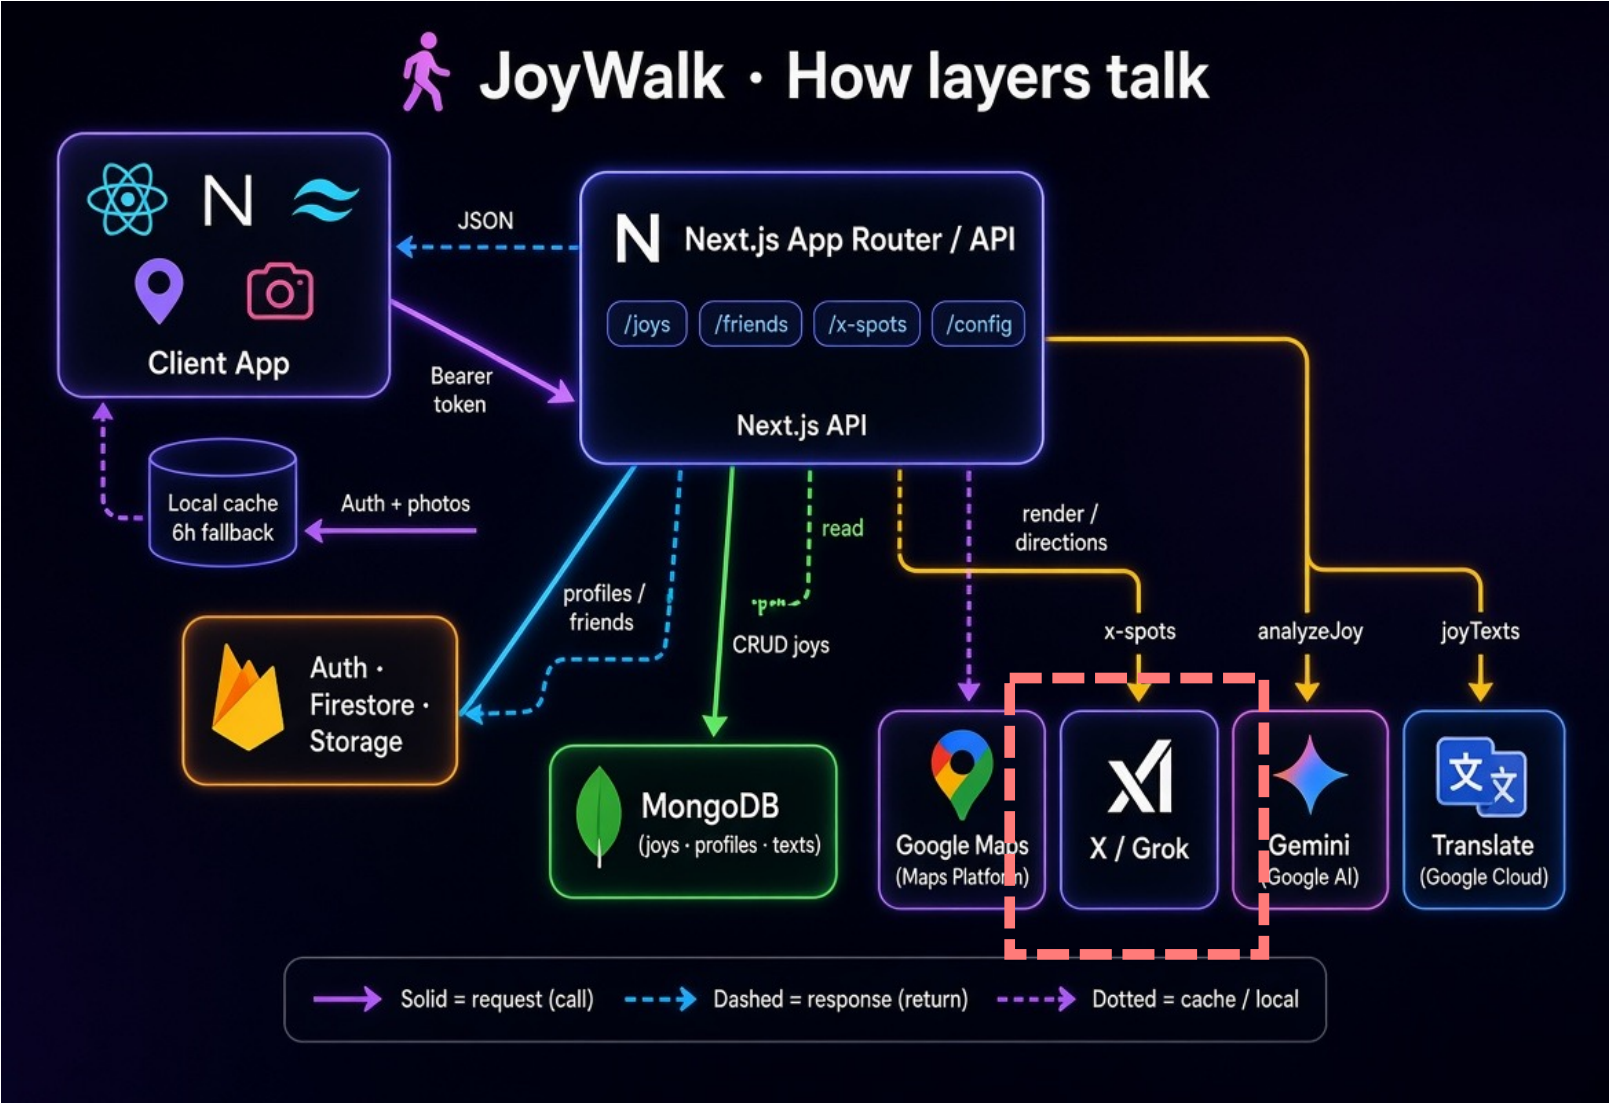

THIS IS JOYWALK

Joy is already on your way.

It helps you discover the joy already on your way.

It reveals the moments already around you.

00:35

Grok powers three layers of JoyWalk

1. Understands every bubble

- reads photo + text → title, emoji, category, tags.
- Runs in background.

2. Makes every bubble global

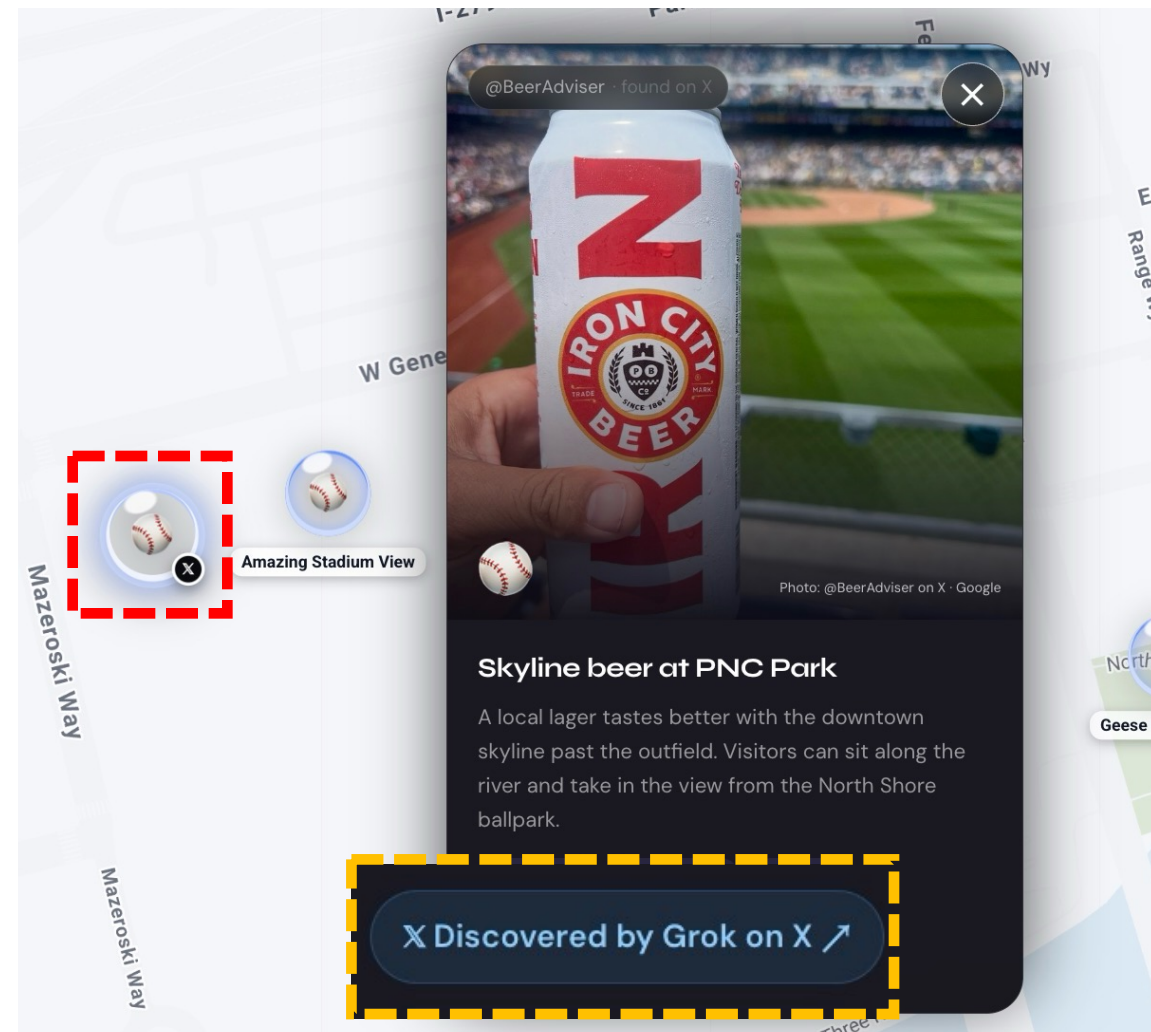

- Auto-translates to EN · KO · ES · ZH · JA
- Original text preserved untouched · stored per-language in MongoDB

3. Finds joy already on X (only possible with Grok)

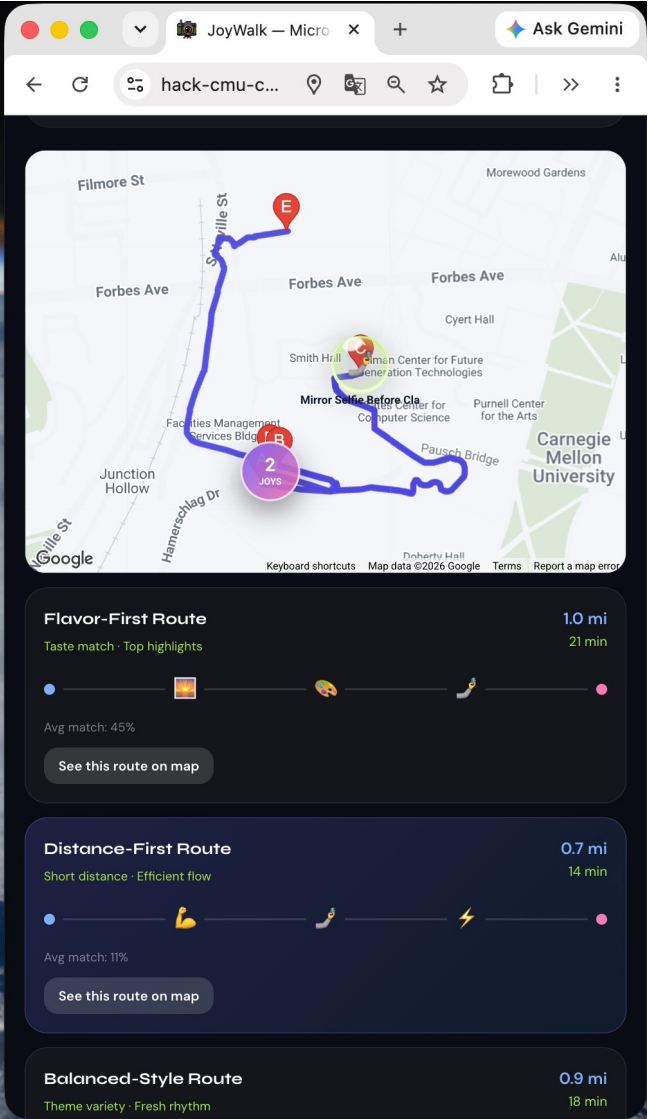

- X Search: recent public posts near Pittsburgh, photo only
 - Verifies the original post + real image URL
 - Summarizes → location · category · tags → becomes a bubble on the map
- 6-hour cache

Why Grok

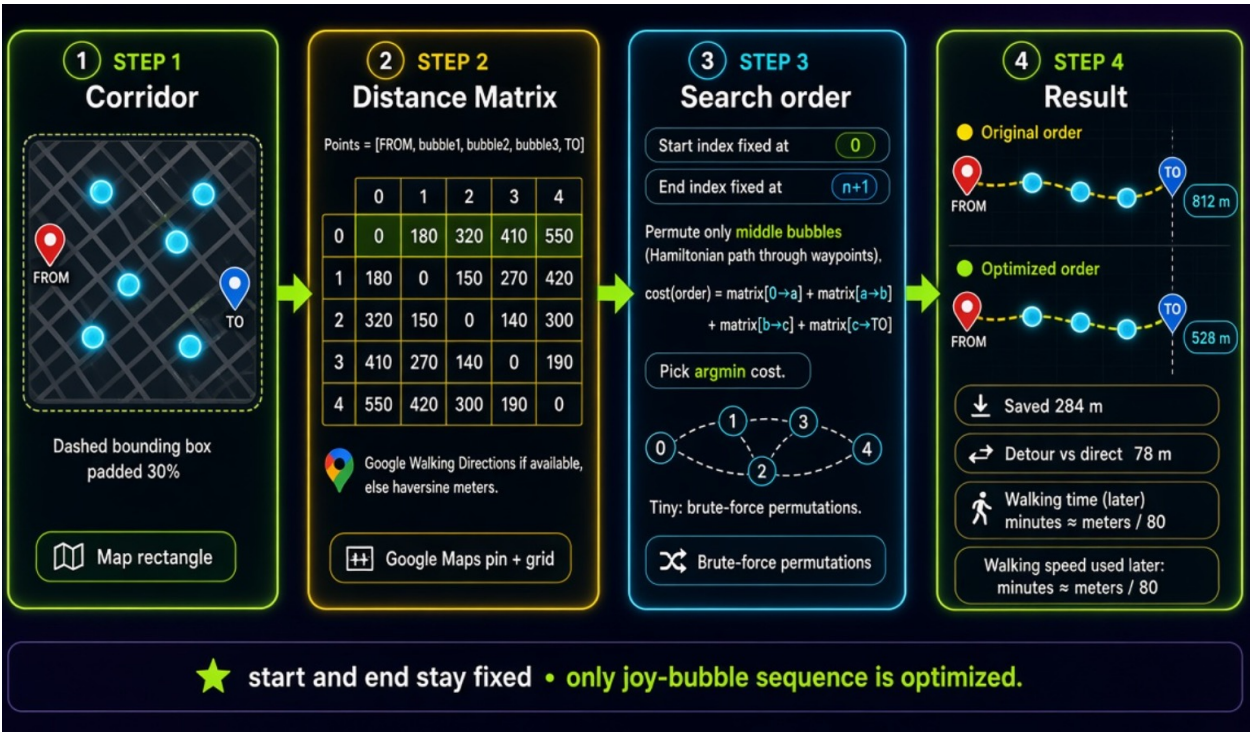

- One model for vision, language, and live X search — no separate pipelines.

Technical implementation

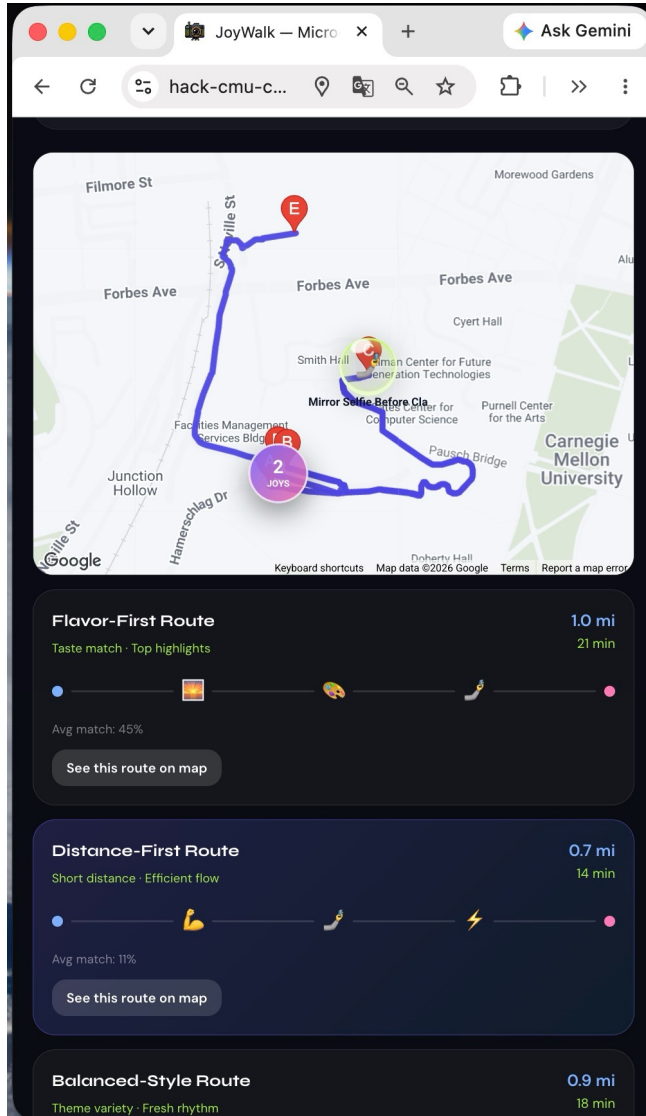

- Collaborative Filtering – Recommendation System
- Hamiltonian Path / TSP – Optimal Path finding

“Every journey in life is a travel. And it's full of small joys.”

*“JoyWalk helps you discover the joy already on your way.
Share your small joy today !”*
